Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.

DETAILED ACTION

Election/Restrictions

Applicant's election of species I (figs 1-5) in Paper No. 3 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 6-14 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 3.

An action on the merits will now follow.

Response to Preliminary Amendment

The application's bib data sheet shows the correct name as was filed in the OATH. The name is noted.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 162 – fluid (page 12, line 15), 106- second end of shaft, 114- piston, 118 resilient material, 138- means for securing needle shield, 150- means for moving the needle shield , 158- means for moving needle shield, 146 -second position in figure 1, 154 – single hand, 158 – means for containing fluid leaking, 166, 242, 246 – means for

Art Unit: 3763

containing any fluid leaking in figure 4, 252- means for containing any fluid leaking fig.

5. It is unclear whether applicant has used multiple reference numeral for the same parts or are missing elements not shown in the figures. Applicants are requested to peruse the specification and provide for all the missing details which may have not been noticed by the Examiner. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

It is the Examiner's position that Applicant has evoked sixth paragraph, means-plus-function language to define Applicant's invention. Therefore the Examiner requires the Applicant to amend the specification pursuant to 37 CFR 1.75(d) and MPEP 608.01(o) to explicitly state, with reference to the terms and phrases of the claim element, what structure, materials, and acts perform the function recited in the claim element. Please note that the MPEP clearly states, "Even if the disclosure implicitly sets forth the structure, materials, or acts corresponding to the means-(or step-) plus-function claim element in compliance with 35 U.S.C. 112, first and second paragraphs, the PTO may still require the applicant to amend the specification pursuant to 37 CFR 1.75(d) and MPEP 608.01(o)...". (Also see **MPEP 2181** (Rev. 1, Feb.2000))

Figures 6-12 lacks a brief description.

Appropriate correction is required.

Claim Objections

Claims 1-5 are objected to because of the following informalities: It is the Examiner's position that Applicant has evoked sixth paragraph, means-plus-function language to define Applicant's invention. Therefore the Examiner has objected to the claims for the reasons set forth above in the objection to the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kornberg (U.S. Patent No. 4,969,877).

Kornberg disclose a safety syringe comprising a hollow body 28, an outlet portion 26, a needle 24, a plunger 34, a piston 35, a thumb pad 50, a needle shield 12, a means for securing 18,48,54,56 and a means for moving the needle shield 46, and means for containing any fluid leaking (22) from the second end of the needle (see figure 8 and 10a).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable Kornberg (U.S. Patent No. 4,969,877) in view of Vallelunga et al. (U.S. Patent No. 5,595,566).

Kornberg discloses the invention substantially as claimed. See above. However, Kornberg teaches flanges as the means for moving the needle shield. Vallelunga teaches a syringe having a shielding device with a means to move the shield comprising an indentation for better gripping of the shielding to prevent accidental needle sticks in the analogous art. (See col. 12 lines 33-39). It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute the finger grip of Kornberg with the indented finger grip as taught by Vallelunga et al. in order to provide operational displacement of the needle shield and further prevent needle sticks.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
